OWNER'S MANUAL

Read and understand this entire manual before riding! DO NOT RETURN TO STORE!

NOTE: Manual illustrations are for demonstration purposes only. Illustrations may not reflect exact appearance of actual product. Specifications subject to change without notice.
SAFETY WARNINGS

WARNING: Riding the electric scooter can be a hazardous activity. Certain conditions may cause the equipment to fail without fault of the manufacturer. Like other electric products, the scooter can and is intended to move, and it is therefore possible to lose control, fall off and/or get into dangerous situations that no amount of care, instruction or expertise can eliminate. If such things occur you can be seriously injured or die, even when using safety equipment and other precautions. RIDE AT YOUR OWN RISK AND USE COMMON SENSE.

This manual contains many warnings and cautions concerning the consequences of failing to maintain, inspect or properly use your electric scooter. Because any incident can result in serious injury or even death, we do not repeat the warning of possible serious injury or death each time such a possibility is mentioned.

APPROPRIATE RIDER USE AND PARENTAL SUPERVISION
This manual contains important safety information. It is your responsibility to review this information and make sure that all riders understand all warnings, cautions, instructions and safety topics and assure that young riders are able to safely and responsibly use this product. We recommend that you periodically review and reinforce the information in this manual with younger riders, and that you inspect and maintain your scooter to ensure its safety.

The recommended rider age is adult. Any rider unable to fit comfortably on the scooter should not attempt to ride it.

Keep this product away from small children and remember that it is intended for use only by persons who are, at a minimum, completely comfortable and competent while operating the scooter.

DO NOT EXCEED THE WEIGHT LIMIT OF 265 pounds (120kg). Rider weight does not necessarily mean a person’s size is appropriate to fit or maintain control of the scooter.

Do not touch the brakes or motor on your scooter when in use or directly after use as these parts can become very hot.

ACCEPTABLE RIDING PRACTICES AND CONDITIONS
Always check and obey any local laws or regulations which may affect the locations where the electric scooter may be used.

Ride defensively. Watch out for potential obstacles that could catch your wheel or force you to swerve suddenly or lose control. Be careful to avoid pedestrians, skaters, skateboards, scooters, bikes, children or animals who may enter your path, and respect the rights and property of others.

Do not activate the speed control on the hand grip unless you are on the scooter and in a safe, outdoor environment suitable for riding.

Do not attempt or do stunts or tricks on your electric scooter. This scooter is not made to withstand abuse from misuse such as jumping, curb grinding or any other type of stunts.

Maintain a hold on the handlebars at all times.

Never carry passengers or allow more than one person at a time to ride the scooter.

Never use near steps or swimming pools.

Keep your fingers and other body parts away from the chain, drive chain, steering system, wheels and all other moving components.

Never use headphones or a cell phone when riding.

Never hitch a ride with another vehicle.

Do not ride your scooter in wet or icy weather and never immerse the scooter in water, as the electrical and drive components could be damaged by water or create other possibly unsafe conditions.

The electric scooter is intended for use on flat, dry surfaces such as pavement or level ground without loose debris such as sand, leaves, rocks or gravel. Wet, slick, bumpy, uneven or rough surfaces may impair traction and contribute to possible accidents. Do not ride your scooter in mud, ice, puddles or water. Avoid excessive speeds that can be associated with downhill rides. Never risk damaging surfaces such as carpet or flooring by using the electric scooter indoors.

Do not ride at night or when visibility is limited.

PROPER RIDING ATTIRE
Always wear proper protective equipment such as an approved safety helmet (with chin strap securely buckled). A helmet may be legally required by local law or regulation in your area. Elbow and kneepads, a long-sleeved shirt, long pants, and gloves are recommended. Always wear athletic shoes (lace-up shoes with rubber soles), never ride barefooted or in sandals, and keep shoeslaces tied and out of the way of the wheels, motor and drive system.

USING THE CHARGER
The charger supplied with the electric scooter should be regularly examined for damage to the cord, plug, enclosure and other parts, and in the event of such damage, the scooter must not be charged until the charger has been repaired or replaced.

Use only with the recommended charger.

Use caution when charging.

The charger is not a toy. Charger should be operated by an adult.

Do not operate charger near flammable materials.

Unplug charger and disconnect from scooter when not in use.

Do not exceed charging time.

Always disconnect from the charger prior to wiping down and cleaning your scooter with liquid.

FAILURE TO USE COMMON SENSE AND HEED THE ABOVE WARNINGS INCREASES RISK OF SERIOUS INJURY. USE WITH APPROPRIATE CAUTION AND SERIOUS ATTENTION TO SAFE OPERATION.
BEFORE YOU BEGIN

Remove contents from box. Remove the foam separators that protect the components from damage during shipping. Inspect the contents of the box for scratches in the paint, dents or kinked cables that may have occurred during shipping. Because the scooter is 95 percent assembled and packed at the factory, there should not be any problems, even if the box has a few scars or dents.

MAKE SURE POWER SWITCH IS TURNED “OFF” BEFORE CONDUCTING ANY ASSEMBLY OR MAINTENANCE PROCEDURES.

Estimated Assembly and Set-Up Time
Allow up to 20 minutes for assembly, not including initial charge time. Allow up to 18 hours for initial charge.

WARNING:
DO NOT USE NON-PRODUCTS WITH YOUR ELECTRIC SCOOTER.
The scooter has been built to certain design specifications. The original equipment supplied at the time of sale was selected on the basis of its compatibility with the frame, fork and all other parts. Certain aftermarket products may or may not be compatible.

Required Tools

key wrenches
14mm wrenches
(Not Included)
Bicycle-style tire pump
for Schrader valve tires,
with pressure gauge
(Not Included)
**ASSEMBLY AND SET-UP**

- **Install the Scooter**
  1. Put down the scooter's foot
  2. Pull the folded key which between the left and right handlebar to unfold the scooter
  3. Lift the handlebar and close the key
  4. Loosen and tighten the screw to adjust the handlebar
  5. According to the scale of the handlebar to adjust the height
  6. Before using, put the fuse inside the fuse box, and turn on

- **Attaching the Seat (if applicable)**
  1. Lock the seat holder to the scooter
  2. Put the seat bar and adjust the suitable height
  3. Close the seat key
  4. Put the seat and tighten the screw

- **Charging the Battery**
  Your electric scooter may not have a fully charged battery. Therefore it is a good idea to charge the battery prior to use.

  Plug charge the battery for some time, although you do not use the scooter.

  ![Charger](image1)

  1. **Turn OFF** power switch before charging. Plug the charger into the charger port on the electric scooter.
  2. **Plug** the charger into a wall outlet. If the lights on charger do not light up, check the power to the outlet. If necessary, try a different outlet.

  **WARNING:** Always disconnect your scooter from the charger before cleaning with liquid.

  **Note:** If your charger does not look like the one illustrated, your unit has been supplied with an alternative charger. The specifications and charging procedure would not change.

  The charger has a small window with one LED or two LEDs to indicate the charge status. Refer to the illustration on the charger unit for the actual "charging" and "charged" status indications for your model charger.

  Chargers have built-in over-charge protection to prevent battery from being over-charged.

  Charger will get warm during use. This is normal for some chargers and is no cause for concern. If your charger does not get warm during use, it does not mean that it is not working properly.

  **WARNING:** Failure to recharge the battery at least once a month may result in a battery that will no longer accept a charge.
CONNECTORS/HARDWARE MAINTENANCE

- **Brake**
  Check the brakes for proper function. When you squeeze the lever, the brake should provide positive braking action. When you apply the brake with the speed control on, the brake cut-off switch should stop the motor. Make sure that brakes are not rubbing.

- **Frame, Fork and Handlebars**
  Check for cracks or broken connections. Although broken frames are rare, it is possible for an aggressive rider to run into a curb or wall and warp and bend or break a frame. Get in the habit of inspecting your scooter on a regular basis.

- **Tires**
  Periodically inspect the tires for excess wear, and regularly check the tire pressure and re-inflate as necessary.

- **Safety Gear**
  Always wear proper protective gear such as an approved safety helmet. Elbow pads and kneepads are recommended. Always wear athletic shoes (lace-up shoes with rubber soles), never ride barefooted or in sandals, and keep shoelaces tied and out of the way of the wheels, motor and drive system.

- **Battery**
  Make sure the power switch is turned off whenever the scooter is not in use. Never store the product in freezing or below freezing temperatures! Freezing will permanently damage the battery.

---

**STOP**

Do not use this product for the first time until you have inflated the tires to the correct PSI and charged the battery for at least 15 hours. Failure to follow these instructions may damage your product and void your warranty.

---

REPAIR AND MAINTENANCE

Turn power switch “OFF” before conducting any maintenance procedures.

- **Adjusting the Chain**
  Turn the screw to let the chain up or down, keep the chain in the appropriate state. Plz note the chain can not be too tight. Test ride the scooter, Readjust as needed.

---

Note: If you are not familiar with it or do not feel comfortable performing the adjustment, consult the professional service center.
**Battery Care and Disposal**

Do not store the battery in temperatures above 75°F or below -10°F.

![Recycle Symbol] CONTAINS SEALED LEAD ACID BATTERIES. BATTERIES MUST BE RECYCLED.

**Disposal:** Your product uses sealed lead-acid batteries which must be recycled or disposed of in an environmentally safe manner. Do not dispose of a lead-acid battery in a fire. The battery may explode or leak. Do not dispose of a lead-acid battery in your regular household trash. The incineration, land filling or mixing of sealed lead-acid batteries with household trash is prohibited by law in most areas. Return exhausted batteries to a federal or state approved lead-acid battery recycler or a local seller of automotive batteries.

**Charger**

The charger supplied with the electric scooter should be regularly examined for damage to the cord, plug, enclosure and other parts and in the event of such damage, the product must not be charged until it has been repaired or replaced.

Use ONLY with the recommended charger.

**Wheels**

Wheels and drive system are subject to normal wear and tear. It is the responsibility of the user to periodically inspect wheels for excess wear and adjust and replace drive train components as required.

**Replacement Parts**

The most frequently requested replacement parts are available for purchase.

**TROUBLESHOOTING GUIDE**

<table>
<thead>
<tr>
<th>Problem</th>
<th>Possible Cause</th>
<th>Solution</th>
</tr>
</thead>
<tbody>
<tr>
<td>Scooter does not run</td>
<td>Undercharged battery</td>
<td>Charge the battery. A new battery should be charged for at least 18 hours before using the scooter for the first time and up to 12 hours after each subsequent use. Check all connectors. Make sure the charger connector is tightly plugged into the charging port, and that the charger is plugged into the wall.</td>
</tr>
<tr>
<td>Scooter suddenly stopped working while in use</td>
<td>Tripped circuit breaker</td>
<td>Check all wires and connectors to make sure they are tight. The circuit breaker (next to on/off switch) will automatically shut off the power if the motor is overloaded. An excessive overload, such as too heavy a rider or too steep a hill, could cause the motor to overheat. If the scooter suddenly stops running, wait a few seconds and then push the breaker to reset the circuit. Correct the conditions that caused the breaker to trip and avoid repeatedly tripping the breaker.</td>
</tr>
<tr>
<td>Short run time (less than 15 minutes per charge)</td>
<td>Undercharged battery</td>
<td>Charge the battery. A new battery should be charged for at least 18 hours before using the scooter for the first time and up to 12 hours after each subsequent use. Check all wires and connectors. Make sure the battery connector is tightly plugged into the charger connector, and that the charger is plugged into the wall. Battery is old and will not accept full charge Make sure power flow to the wall outlet is on. Even with proper care, a rechargeable battery does not last forever. Average battery life is 1 to 2 years depending on scooter use and conditions. Replace only with a replacement battery.</td>
</tr>

<td>Problem</td>
<td>Possible Cause</td>
<td>Solution</td>
</tr>
<tr>
<td>----------------------------------------------</td>
<td>--------------------------------------------</td>
<td>------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Scooter runs sluggishly</td>
<td>Riding conditions are too stressful</td>
<td>Use only on solid, flat, clean and dry surfaces such as pavement or level ground.</td>
</tr>
<tr>
<td></td>
<td>Tires are not properly inflated</td>
<td>The tires are inflated when shipped, but they invariably will lose some pressure between the point of manufacturing and your purchase.</td>
</tr>
<tr>
<td></td>
<td>Scooter is overloaded</td>
<td>Make sure you do not overload the electric scooter by allowing more than one rider at a time, exceeding the 265 lbs. (120kg.) maximum weight limit, going up a hill or towing objects behind the scooter. If the scooter is overloaded, the circuit breaker may trip and shut off power to the motor. Correct the riding conditions that caused the overload, wait a few seconds, and then push the breaker to reset the circuit. Avoid repeatedly tripping the circuit breaker.</td>
</tr>
<tr>
<td>Sometimes the scooter doesn’t run, but other times it does</td>
<td>Loose wires or connectors</td>
<td>Check all wires around the motors and all connectors to make sure they are tight.</td>
</tr>
<tr>
<td></td>
<td>Motor or electrical switch damage</td>
<td>Contact your local authorized service center for diagnosis and repair.</td>
</tr>
<tr>
<td>Scooter makes loud noises or grinding sounds</td>
<td>Chain is too dry</td>
<td>Apply a lubricant such as 3 in 1™ or Tri-Flow™ to the chain.</td>
</tr>
