Please keep this manual properly.

NOTE

1. All photos in this manual are used to specify the operation and construction of the product. When you find some differences between the product and the photo, please follow the product.
2. We won't notify you when we modify the construction and appearance of the product partially in order to improve the product quality.

Please read this manual carefully before operation. The children must operate the vehicle under operation instruction. The vehicle complies with standards:

- GB6675-2003, GB19865-2005, GB5296.5-2006;
- ASTM F963;
- EN71, EN62115.
GENERAL WARNING: Riding on the toy can be a hazardous activity. Electric vehicles can, and are intended to, move and it is therefore possible to get into dangerous situations and/or lose control and/or fall off. If such things occur you can be seriously injured or die. LIKE ANY OTHER MOVING PRODUCT, USING THE TOY CAN BE A DANGEROUS ACTIVITY AND MAY RESULT IN INJURY OR DEATH EVEN WHEN USED WITH SAFETY EQUIPMENT AND OTHER PRECAUTIONS. USE AT YOUR OWN RISK AND USE COMMON SENSE.

Always check and obey local laws or regulations which may affect the locations where the toy may be used. The toy is meant to be used only in controlled environments free of potential traffic hazards, and not on public streets or sidewalks. Do not try to ride your toy on public streets or in any area where pedestrian or vehicle traffic may present a risk of collision or injury to yourself or others. Watch out for potential obstacles including pedestrians, skaters, skateboards, bikes, children or animals who may enter your path, and respect the rights and property of others.

Do not ride the toy in wet weather and never immerse the toy in water, as the electrical and drive components of the toy could be damaged by water or create other possibly unsafe conditions.

The toy is designed to perform best outdoors on solid, flat, clean and dry surfaces. Wet, slick or uneven and rough surfaces may impair traction and contribute to possible accidents. Use only on flat, dry, level ground without loose debris, such as rocks or gravel. Do not ride a toy in mud, ice, puddles or water. Avoid excessive speeds that can be associated with downhill rides. Never risk damaging indoor surfaces such as carpet or flooring by use of a toy indoors.

Do not ride at night or in impaired visibility conditions.

Always wear proper protective equipment, such as an approved safety helmet, elbow pads and kneepads. A helmet may be legally required by local law or regulation in your area, and should always be worn when riding it. Always wear shoes, never ride barefooted or in sandals, and keep shoelaces tied and out of the way of the wheels, motor and drive system.

Do not exceed the weight limit of 35KGS.

Do not attempt or do stunts or tricks on your toy. The toy is not made to withstand abuse from misuse such as jumping, grinding or any other type of stunts.

FAILURE TO USE COMMON SENSE AND HEED THE ABOVE WARNINGS FURTHER INCREASES RISK OF SERIOUS INJURY. USE AT YOUR OWN RISK AND WITH APPROPRIATE AND SERIOUS ATTENTIONS TO SAFE OPERATION.

AN IMPORTANT MESSAGE TO RIDERS AND PARENTS: READ THIS ENTIRE MANUAL BEFORE OPERATING OR ALLOWING USE OF THE TOY, AND KEEP THIS MANUAL AVAILABLE FOR FUTURE REFERENCE. This manual contains important information. For safety reasons, it is your responsibility to review this information and make sure that all warnings, cautions, instructions, and safety topics and assure that young riders are capable and able to use this product safely and responsibly. We recommend that you periodically review and reinforce the information in this manual with younger riders, and you are required to inspect and maintain your child’s vehicle to ensure their safety.

The recommended rider age is only an estimate and can always being affected based on a particular rider’s size, weight or skills. If the rider is unable to fit comfortably on the toy, don’t attempt to ride on it.

Toy components overview

1. main body  
2. wheel  
3. charger  
4. plate  
5. 12mm washer  
6. bushing  
7. cotter pin  
8. axle cover  
9. gearbox driver  
10. gearbox container cover  
11. gearbox  
12. handle assembly  
13. rear axle  
14. 4x16 screw

Parts assembly instructions.

1. Put the tow gearboxes at the rearside.
2. Put the rear axle through the gearboxes.
3. Screw the gearbox container covers tight with 4x16 screws at two sides.
4. Put the gearbox drivers onto the rear axle.
5. Put the two rear wheels onto the rear axle.
6. Put the bushings into the wheels.
7. Slide a washer onto the rear axle.
8. Put the cotter pins into the rear axle.
9. Connect the power at handle assembly.
10. Put the handle bar into the main body and make it tight.
11. Using the plate to make the handle bar tight.
12. Screw the plate onto the main body using 4x16 screw.
13. Slide the washer onto the front axle.
14. Put a bushing into the two wheels.
15. Put wheels onto the front axle.
Safety Check Before Riding

There should not be any unusual rattles or sound from loose parts or broken components. If you are not sure, ask an experienced mechanic to check.

Safety

⚠️ WARNING: Maintain a hold on the handlebars at all times.

⚠️ WARNING: Do not ride more than one person at a time. Never use near steps or swimming pools.

⚠️ WARNING: Not suitable for children under 36 months due to small parts.

**NOTICE:** When you get the toy, the assembly instruction may not completely conform with your assembly. Check the functions before using the toy for safety concerned.

**Charging the battery prior to use.** Your toy may not have a fully charged battery at the time of purchase. Therefore it is a good idea to charge the battery prior to use.

Plug the charger’s plug into the power outlet. Make sure the power on the wall is ON.

Use the battery and charger only specified by our company for safety concerned.

**Please Note**

Make sure the voltage specification of the charger meets your local compartment.

Before charging the battery, please make sure the toy is switched to “OFF” MODE.

16. Put bushings into the front wheels.
17. Put washers onto the front axles at both sides.
18. Put cotter pins into the front axle and make the wheels tight.
19. Put the axle covers onto the 4 wheels.
20. Connect the power at the battery under the seat.

**NOTE:** When you get the toy, the assembly instruction may not completely conform with your assembly. Check the functions before using the toy for safety concerned.

- Charging Socket

Before charging the battery, please make sure the toy is switched to “OFF” MODE.
**WARNING TO PARENTS:** Kids need to be taught and be frequently reinforced of the importance of safe riding, the rules of the road and the importance of avoiding using the toy on streets due to dangers and hazards of traffic, especially motor vehicle traffic. Parents and children are urged to read and understand these safety tips together.

Ride defensively. Assume that pedestrians and others are so absorbed in their own world that they are not paying any attention to you and that they will run you down or step out in front of you, all without any warning.

Watch for obstacles such as pot holes, sewer grates, expansion cracks, and road or construction debris (such as nails or other foreign objects) that could catch your wheel or force you to swerve into traffic or lose control.

Never carry a passenger.

Never hitch a ride with another vehicle.

Riding a toy car may be a hazardous activity and has inherent dangers that no amount of care, caution, instruction or expertise can eliminate. Certain conditions may cause the equipment to fail without fault of the manufacturer. Activities involving the use of electric vehicles carry the risk of injury or death.

The transformer/charger supplied with the go cart should be regularly examined for damage to the cord, plug, enclosure and other parts and, in the event of such damage, the scooter must not be charged until it has been repaired or replaced.

**Warnings**

It is important to read and follow all the instructons and safety information contained in this Operation Manual prior to use.

- Do not operate at night
- Comply with all local laws and regulations
- Do not use in wet conditions
- Do not ride in off-road conditions
- Make sure the environment is safe for riding
- Recommend for riders 36 months and up
- Ensure battery is properly charged before use
- Do not ride on sloped areas
- Do not expose the charger on moisture or water
- Do not leave the power on when not in use
- Do not modify any parts
- Practice riding the toy in a large, open area
- Do not ride through standing water, in sand, mud, hilly or low visibility conditions.
- Never ride near streets, swimming pools, hills, steps, sloped driveways or motor vehicles. And watch your surroundings for pedestrians, bikes, and skateboard and scooter rides.
- Rechargeable batteries are only to be charged under adult supervision.
- The battery chargers used with the toy are to be regularly examined for damage to the cord, plug, enclosure and other parts and, in the event of such damage, they must not be used until the damage has been repaired.
- The appliance is intended to be assembled by an adult.
- Rechargeable batteries are only to be charged under adult supervision
- Battery must be inserted with the correct polarity.
- Exhausted batteries are to be removed from the toy.
- The supply terminals are not to be short-circuited.
- Different type of batteries or new and old battery are not to be mixed.
- Non-rechargeable battery can not be charged.

### Problems and Solutions

<table>
<thead>
<tr>
<th>Problem</th>
<th>Possible Cause</th>
<th>Solution</th>
</tr>
</thead>
<tbody>
<tr>
<td>Vehicle does not run</td>
<td>Charge is not working</td>
<td>There is no sure way to tell if your charger is working unless you have a voltmeter. If you suspect there is a problem with your charger, contact authorized service center. They can test your charger for you.</td>
</tr>
<tr>
<td>Battery not charged</td>
<td>Tripped fuse</td>
<td>The built-in fuse may “trip” and shut down operation of the vehicle if the vehicle is overloaded or the driving conditions too severe. Once a fuse has “triped”, remove your foot from the pedal and replace the fuse with a spare. To avoid repeated automatic shut downs, do not overload the vehicle by exceeding the 30 kg maximum weight capacity or by towing anything behind the vehicle. Do not drive up hills or run into fixed objects which can cause the wheels to stop spinning while power is still being supplied to the service center.</td>
</tr>
<tr>
<td>Loose wire or loose</td>
<td>Loose wire or loose connectors</td>
<td>Check all wires and connectors. Make sure the motor harness connectors are plugged into the battery and that there are no loose wires around motors.</td>
</tr>
<tr>
<td>Perished battery</td>
<td>Dead battery</td>
<td>If your battery is old or if you have not followed battery care instruction, your battery may be dead, you can have it tested at service center.</td>
</tr>
<tr>
<td>Electrical switch</td>
<td>Electrical switch damage</td>
<td>The electrical switches can become corroded due to exposure to water or moisture, or can jam due to loose dirt, sand or gravel.</td>
</tr>
<tr>

<td>POSSIBLE CAUSE</td>
<td>SOLUTION</td>
</tr>
<tr>
<td>-------------------------------</td>
<td>----------------</td>
<td>-----------------------------------------------</td>
</tr>
<tr>
<td>Short run time (less than 0.5 hour per charge)</td>
<td>Uncharged battery</td>
<td>Charge the battery. A new battery should have been charged for at least 12 hours before using the vehicle for the first-time use, recharge the battery for at least 12 hours after each use. Never charge the battery longer than 22 hours.</td>
</tr>
<tr>
<td></td>
<td>Over charged battery</td>
<td>Do not charge the battery longer than 22 hours. If you suspect that your battery is damaged as a result of over charging, contact service center. They can test your battery for you.</td>
</tr>
<tr>
<td></td>
<td>Battery is old will not accept full charge</td>
<td>Even with proper care, a rechargeable battery does not last forever. Average battery life is 1 to 3 years depending on vehicle use and use conditions. Replace the battery with a new 12 volt rechargeable battery, do not substitute parts.</td>
</tr>
<tr>
<td></td>
<td>Tripped fuse</td>
<td>The bulb-in fuse may &quot;trip&quot; and shut down portion of the vehicle if the vehicle is over loaded of the driving conditions too severe. Once a fuse has &quot; tripped &quot; remove your foot from the pedal and replace the fuse with care. To avoid repeated automatic shutdowns, do not over load the vehicle by exceeding the 35 KGS. Maximum weight capacity or by towing anything behind the vehicle. Do not drive up hills or run into fixed objects, which can cause the wheels to stop spinning while power is still being supplied to the motors. If a fuse continually trips, contact service center.</td>
</tr>
