**OPERATION MANUAL**

**ZP3999 (A/B)**

**1. Introduction**

Please read this product manual carefully before using it. Without using this product before reading the instructions, you or the children are prone to accident, injury or damage.

**2. Specifications**

- **Power voltage**: DC 18V
- **Power life**: 10-15 hours
- **Max speed**: 3.5 km/h
- **Net Weight**: 9.5 kg
- **Max load**: 20 KG

**3. BEFORE USE**

1. **Check the charger**: When using, ensure that the power plug is in a grounded socket to avoid electric shocks. If the charger is damaged, do not use it. If needed, take it to the nearest store for repair or replacement. 
2. **Check the battery power**: Before you use the toy for the first time, charge the battery for 12 hours. 
3. **Check the charger or the battery connection**: Ensure that the charger and battery are connected firmly. 
4. **Check the charger and battery temperature**: After charging, ensure that the charger and battery do not become excessively hot. 
5. **Check the power's positive and negative cord**: Ensure that the positive and negative cords are not damaged. 
6. **Check the charger and the battery**: Ensure that the charger and battery are working properly. 
7. **Check the fuse**: Ensure that the fuse is not damaged or broken. 

**4. DURING USE**

1. **Check the power's positive and negative cord**: Ensure that the positive and negative cords are not damaged. 
2. **Check the charger and battery**: Ensure that the charger and battery are working properly. 
3. **Check the fuse**: Ensure that the fuse is not damaged or broken. 

**5. AFTER USE**

1. **Check the power's positive and negative cord**: Ensure that the positive and negative cords are not damaged. 
2. **Check the charger and battery**: Ensure that the charger and battery are working properly. 
3. **Check the fuse**: Ensure that the fuse is not damaged or broken. 

**6. Maintenance and Repair**

- **Fuse assembly**: When the fuse is broken, do not use the toy. After repair, you can use it. 
- **Charger use**: When charging, do not use the charger in water. It may cause the charger to short circuit. 

**7. Charging**

1. **Check the charger**: When using, ensure that the power plug is in a grounded socket to avoid electric shocks. If the charger is damaged, do not use it. If needed, take it to the nearest store for repair or replacement. 
2. **Check the battery power**: Before you use the toy for the first time, charge the battery for 12 hours. 
3. **Check the charger or the battery connection**: Ensure that the charger and battery are connected firmly. 
4. **Check the charger and battery temperature**: After charging, ensure that the charger and battery do not become excessively hot. 
5. **Check the power's positive and negative cord**: Ensure that the positive and negative cords are not damaged. 
6. **Check the charger and the battery**: Ensure that the charger and battery are working properly. 
7. **Check the fuse**: Ensure that the fuse is not damaged or broken. 

**8. Safety**

1. **Check the power's positive and negative cord**: Ensure that the positive and negative cords are not damaged. 
2. **Check the charger and battery**: Ensure that the charger and battery are working properly. 
3. **Check the fuse**: Ensure that the fuse is not damaged or broken. 

**9. TIPS OF OPERATION**

1. **Check the power's positive and negative cord**: Ensure that the positive and negative cords are not damaged. 
2. **Check the charger and battery**: Ensure that the charger and battery are working properly. 
3. **Check the fuse**: Ensure that the fuse is not damaged or broken.
